

# IMPROVING CHEMICAL SAFETY IN SCHOOLS

PROFESSIONAL DEVELOPMENT WORKSHOP

**AUGUST 7, 2017**

**1-5PM**

This four hour hands-on workshop is designed for educators and will enable them to determine hazards and reduce risk in a teaching environment. The goal of this workshop is to assist classroom teachers, school administrators, chemical hygiene officers, and science museum professionals to better understand the safe management and use of the chemicals used in educational settings. These settings include middle and high school classrooms, science museums, as well as any other educational environment. Workshop topics will include the most recent information on the GHS system of labeling chemicals, chemical inventory and storage, risk assessment, the basics of hazardous waste management, how to evaluate the safety quality of a YouTube clip, and how to evaluate the quality of a safety data sheet. Many new resources developed by the American Chemical Society will be discussed. The workshop leader is Ms. Samuella Sigmann, CCHO, of Appalachian State University.

Register for workshop at <https://goo.gl/forms/xJlG8pizYLdRuFZk1> or by calling 828.262.3185.

Please contact Samuella Sigmann for more information at [sigmannsb@appstate.edu](mailto:sigmannsb@appstate.edu).
